INFORMATION SOURCES

Percent taken online is the percentage of all online course attempts while enrolled in the completed program. Calculated for FY2021 graduates. Only applicable to pre-licensure BSN programs at Chamberlain.

Total program costs is the total tuition, fees and average estimated textbook and equipment expense for a student attending full-time who takes and passes every course currently required by the program at a single time at Chamberlain 2022-2023 tuition rates.

Median tuition, books and fees paid is the median amount paid to Chamberlain by students who graduated from this program in the 2020-2021 academic year. This amount is different than the total program costs and may be different for each student because students may transfer credits from other colleges, repeat courses that are not passed the first time or choose this program after first choosing other programs at Chamberlain.

Median total debt is the median total debt (federal, private and institutional loans) of students who completed this program in the 2020-2021 academic year.

The median earnings two years after graduation is calculated or compiled and reported by the U.S. Department of Education as part of the College Scorecard available at: <https://collegescorecard.ed.gov>. THIS DOCUMENT DOES NOT GUARANTEE EMPLOYMENT OR A CERTAIN SALARY RANGE, MEDIAN ANNUAL EARNINGS SHOWN MAY NOT REPRESENT ENTRY LEVEL EARNINGS.

Completion rate for first-time, full-time students is the U.S. Department of Education's measure of the percentage of students who are new to college and entered full-time in fall 2015 who complete the program within 150 percent of program length [for a bachelor's degree program, normal time is usually four (4) years and 150 percent of normal time is six (6) years].

Completion rate for all new full-time Chamberlain students is defined similarly to the "first-time, full-time" completion rate above except it includes those who previously attended another institution. Chamberlain calculates this measure based on Chamberlain data for the program.

The loan default rate for the program is calculated by the institution and is based on the program of study for which the student was last enrolled before entering repayment. The default rate measures the percentage of students entering repayment in year ending 9/30/19 who defaulted on their loans within three (3) years.

Loan default rate is the percentage of borrowers entering repayment in between October 1, 2018 and September 30, 2019 who defaulted on their loans within three (3) years. The rate is provided by the U.S. Department of Education and can be found at: <http://www2.ed.gov/offices/OSFAP/defaultmanagement/cdr.html>.

Licensure pass rates are provided by state licensing regulatory bodies to the institution. Where appropriate, state results are aggregated to produce a national average for the institution. Public availability of the testing results varies by profession and state.
